Subject Index

Agranulocytosis induced by propylthiouracil: evidence of a drug dependent antibody reacting with granulocytes, monocytes and haematopoietic progenitor cells (FIBBE *et al*), 363.

Alloantigens, platelet-specific, characterization by immunoblotting: localization of Zw and Bak antigens (VAN DER SCHOOT *et al*), 715.

Anaemia, acquired aplastic: a PNH-like disease? (NISSEN *et al*), 355.

Anaemia, primary acquired sideroblastic (JACOBS), 415.

Anaemia, sickle cell, among Eti-Turks: haematological, clinical and genetic observations (ALUOCH *et al*), 45.

Anaemias, nomifensine-induced immune haemolytic, two types of: drug-dependent sensitization and/or autoimmunization (SALAMA & MUELLER-ECKHARDT), 613.

Antigenic determinants on myeloid leukaemia colony-forming cells resemble those of normal myeloid progenitor cells and differ from those of circulating blast cells (ROBAK *et al*), 133.

Bone marrow transplantation, HLA matched, standardization of T-cell depletion in (GILMORE *et al*), 69.

Bone marrow transplantation, T-cell depleted allogeneic, recovery of immunoglobulin isotypes following (BRENNER *et al*), 125.

Book reviews

Bone Marrow Biopsies Revisited, 633.

Fetal Liver Transplantation, 854.

Genetic Rearrangements in Leukaemia and Lymphoma, 635.

Hematopoietic Stem Cells, 635.

Monoclonal Antibodies, 854.

Monoclonal Antibodies for Cancer Detection and Therapy, 855.

Monoclonal Antibody Therapy of Human Cancer, 856.

Sickle Cell Disease, 633.

Bromodeoxyuridine, determination of the plasma cell labelling index with, in a double fluorescence technique (LOKHORST *et al*), 271.

Burkitt lymphoma, bone marrow purging procedure in, with monoclonal antibodies and complement: quantification by a liquid cell culture monitoring system (FAVROT *et al*), 161.

Burkitt's lymphoma/leukaemia with disseminated intravascular coagulation, variant translocation t(8;22) and abnormalities of chromosome 15(q22) and 17(q12–21) in (DALY *et al*), 561.

Campath-1, the monoclonal antibody, plus human complement, *ex-vivo* T-cell depletion with, effectively prevents acute graft-versus-host disease in allogeneic bone marrow transplantation (HEIT *et al*), 479.

CFU-GM: CFU-mix ratio in the peripheral blood and bone marrow and its importance in autologous transplantation of circulating stem cells (GANSER & HOELZER), 628.

Chinese, organization of the ζ-α genes in (CHAN *et al*), 97.

Danazol fails to increase factor VIII or IX levels in a double-blind crossover study of patients with haemophilia A and B (NUGENT *et al*), 493.

Dermatan sulphate, the haemorrhagic and antithrombotic effects of (FERNANDEZ *et al*), 309.

Erythroblastis, perinuclear peroxidatic activity in (KOIKE *et al*), 621.

Erythrocytes, fetal, in the first trimester of pregnancy, ABO and Rhesus phenotyping of (GEMKE *et al*), 689.

Erythroid progenitors, sheep, *in vitro* growth of (KELLY & WOOD), 757.

Erythroleukaemia, myeloid and erythroid lineage expression of haemopoietic progenitors derived from an abnormal clone in (SUDA *et al*), 647.

Erythropoiesis in pregnancy (HOWELLS *et al*), 595.

Factor VIII, thrombin-activated human, binding to platelets (SOBERANO *et al*), 571.

Falciparum malaria in Thailand, evidence against haemolysis in (MERRY *et al*), 187.

Gammopathy, monoclonal, the incidence of, in a population over 45 years old determined by isoelectric focusing (SINCLAIR *et al*), 745.

Glycoprotein IIb–IIIa complex, a role in the binding of IgE to human platelets and platelet IgE-dependent cytotoxic functions (AMIESEN *et al*), 21.

Haemoglobin gene frequencies in the Jamaican population: a study in 100,000 newborns (SERJEANT *et al*), 253.

Haemoglobinuria, paroxysmal nocturnal, ultrasonic demonstration of clinical and subclinical hepatic venous thrombosis in (BIRGENS *et al*), 737.

Haemophilia A, disappearance of factor VIII:C antibodies with, upon frequent administration of factor VIII in intermediate or low dose (VAN LEEUWEN *et al*), 291.

Haemophilia A and B, danazol fails to increase factor VIII or IX levels in a double-blind crossover study of patients with (NUGENT *et al*), 493.

Haemopoiesis, lineage determination during, and classification of myelodysplastic disorders (ROSE *et al*), 626.

Hb K Woolwich heterozygotes, balanced globin synthesis by (ZAGO *et al*), 207.

Heparin, respective role of antithrombin III and heparin cofactor II in the *in vitro* anticoagulant effect of, and of various sulphated polysaccharides (SIE *et al*), 707.

HTLV-1 carriers, healthy, in Japan: the haematological and immunological characteristics (YASUDA *et al*), 195.

Hypoxia in the mouse, relationship between erythropoiesis and the enhanced intestinal uptake of ferric iron in (RAJA *et al*), 587.

Immune thrombocytopenic purpura: autoimmune or immune complex disease? (KIEFEL *et al*), 57.
Immunoglobulin G, crosslinked, fibronectin-mediated inhibition of human platelet activation by (SYPCHER *et al*), 299.
Insulin stimulates cord blood erythroid progenitor growth: evidence for an aetiological role in neonatal polycythaemia (PERRINE *et al*), 503.
Interferon responses of peripheral blood mononuclear cells from normal and leukaemic children (MOHAMMED *et al*), 789.
Interferons, alpha, in B-cell neoplasms (QUESADA & GUTTERMAN), 639.
Interleukin-2, certain myeloid cells possess receptors for (ARMITAGE *et al*), 799.
Iron uptake, cellular, a membrane function involved in the regulation of: coated pit formation (EGYED *et al*), 263.

Lennert's lymphoma, T-cell origin of (O'CONNOR *et al*), 521.
Leukaemia, acute, in remission, autologous bone marrow transplantation for (GORIN *et al*), 385.
Leukaemia, acute lymphoblastic, after bone marrow transplantation, prediction and prevention of relapse of (BARRETT *et al*), 179.
Leukaemia, acute lymphoblastic, in adults, treatment of (BARNETT *et al*), 455.
Leukaemia, acute myeloid, in 619 adult patients, features affecting outcome during remission induction of (SWIRSKY *et al*), 435.
Leukaemia, acute myeloid, monocyte differentiation in: a cause of Fc binding of monoclonal antibodies (LAWLOR *et al*), 339.
Leukaemia, acute myeloid, the treatment of adult patients with, autologous bone marrow transplantation following high dose chemotherapy for (GOLDSTONE *et al*), 529.
Leukaemia, acute myeloid, surface marker analysis in, and correlation with FAB classification (SAN MIGUEL *et al*), 547.
Leukaemia, adult acute lymphoblastic, effect of intensified chemotherapy on the pluripotent haematopoietic progenitor cells CFU-GEMM in (GANSER & HOELZER), 169.
Leukaemia, childhood acute lymphoblastic, is spontaneous mutation the major 'cause'? (GREAVES & CHAN), 1.
Leukaemia, chronic granulocytic, myelofibrosis in (LAZZARINO *et al*), 227.
Leukaemia, chronic lymphocytic: an AIDS like disease? (MILLARD & KAY), 841.
Leukaemia, chronic lymphocytic and prolymphocytic, the relationship between. III. Evaluation of cell size by morphology and volume measurements (MELO *et al*), 469.
Leukaemia, chronic lymphocytic, the incidence, clonal origin and secretory nature of serum paraproteins in (SINCLAIR *et al*), 725.
Leukaemia, chronic myelogenous: haematological remissions with alpha interferon (TALPAZ *et al*), 87.
Leukaemia, chronic myeloid, with an isochromosome 17q, acute promyelocytic transformation of (VAN DER MERWE *et al*), 751.
Leukaemia, chronic myelomonocytic and juvenile chronic myeloid, cytogenetic evidence for partially committed myeloid progenitor cell origin of: both granulocyte-macrophage precursors and erythroid precursors carry indentical marker chromosome (AMENOMORI *et al*), 539.
Leukaemia, decreased serum 1α,25-dihydroxyvitamin D_3 levels in (WONG *et al*), 844.
Leukaemia, mast cell: evidence for bone marrow origin of the pathological clone (DALTON *et al*), 397.
Leukaemia, myeloid, cell lines, induction of colony-stimulating factor response in (RHYNER & TAETLE), 601.
Leukaemia, pre-B acute lymphoblastic, with unusual phenotype, progression of a myelodysplastic syndrome to (BONATI *et al*), 487.
Leukaemia, T-prolymphocytic, the morphological spectrum of (MATUTES *et al*), 111.
Leukaemia, the relationship between chronic lymphocytic and prolymphocytic. II. Patterns of evolution of 'prolymphocytoid' transformation (MELO *et al*), 77.
Lymphocytosis/neutropenia syndrome, K-cell: the neutropenia is not caused by autoimmunity (VAN DER VEEN *et al*), 777.
Lymphomas, non-Hodgkin, natural killer like cells in (DE PAOLI *et al*), 850.

Megakaryocyte buoyant density and maturity, inverse relationship between (JACKSON *et al*), 33.
Megakaryocytopoiesis *in vitro* of patients with essential thrombocythaemia: effect of plasma and serum on megakaryocytic colony formation (KOMATSU *et al*), 241.
Monosomy 7 and acute mixed leukaemia (SANZ *et al*), 842.
Monosomy 7, simple, and myelodysplastic syndrome in thirteen patients without previous cytostatic treatment (MICHIELS *et al*), 415.
Myelodysplasia, therapy linked, cytogenetic evidence for involvement of erythroid progenitors in a child with (GRIER *et al*), 513.
Myelodysplastic syndrome and simple monosomy 7 in thirteen patients without previous cytostatic treatment (MICHIELS *et al*), 425.
Myelodsyplastic syndrome, a preleukaemic, disappearance of a sideroblastic cell clone during the chronic phase of (SCHMALZL & LECHLEITNER), 410.
Myelodysplastic syndromes, multiple chromosomally distinct cell populations in, and their possible significance in the evolution of the disease (MECUCCI *et al*), 699.
Myelofibrosis in chronic granulocytic leukaemia: clinicopathologic correlations and prognostic significance (LAZZARINO *et al*), 227.
Myelofibrosis, idiopathic, 1,25-dihydroxy-vitamin D_3 ($1,25(OH)_2D_3$) in the treatment of (PETRINI *et al*), 624.
Myelofibrosis, idiopathic, multilineage expression of

haemopoietic precursors with an abnormal clone in (SATO *et al*), 657.
Myelofibrosis, primary, granulopoiesis-supporting effects of marrow stromal cells in continuous culture from patients with (HOTTA *et al*), 669.
Myeloma, multiple, the incidence of Bence-Jones proteinuria in (PASCALI *et al*), 847.

Neutropenia, human cyclic, natural killer activity in (HARA *et al*), 630.
Neutrophils are involved in the increased vascular permeability produced by activated complement in man (WILLIAMSON *et al*), 375.
Nicotine alters fibronectine and factor VIII/vWF in human vascular endothelial cells (BLAES *et al*), 675.
Nomifensine-induced immune haemolytic anaemias, two types of: drug-dependent sensitization and/or autoimmunization (SALAMA & MUELLER-ECKHARDT), 613.

Pancytopenia, reversible, secondary to treatment with tetrathiomolybdate (HARPER & WALSHE), 851.
Paraformaldehyde-fixation-dependent antibodies (VON DEM BORNE *et al*), 205.
Polycythaemia, neonatal, evidence for an aetiological role in: insulin stimulates cord blood erythroid progenitor growth (PERRINE *et al*), 503.
Post-transfusion purpura (PTP) due to anti-Zw^b ($-PI^{A2}$): the significance of IgG3 antibodies in PTP (TAANING *et al*), 217.
Purpura, post-transfusion (MUELLER-ECKHARDT), 419.

Red cell enzymes, how do they age? Hypothesis and facts (PIOMELLI *et al*), 407.

Serotonin release, alloantibody-induced platelet, is blocked by antibody to the platelet PL^{A1} antigen (DUNCAN & ROSSE), 331.
Serum standard for human serum vitamin B_{12} assay, proposed (ICSH), 809.
Sialoglycoproteins, red cell membrane, structure and function of (ANSTEE & TANNER), 211.
Sickling, increasing haemoglobin oxygen affinity to prevent: abnormal haemoglobin variants as models (FRANKLIN *et al*), 319.

Thrombocythaemia, essential, megakaryocytopoiesis *in vitro* of patients with (KOMATSU *et al*), 241.
Thrombocytopenia, clinical significance of positive platelet immunofluorescence test in (VON DEM BORNE *et al*), 767.
Thrombocytopenia, heparin-associated immune, different platelet specificities of heparin-dependent platelet aggregating factors in (PFUELER & DAVID), 149.
Thrombocytopenia, heparin-induced: further studies of the effects of heparin-dependent antibodies on platelets (CHONG & CASTALDI), 347.
Thrombosis, lack of pathogenetic role of proteins C and S in, associated with aspariginase–prednisone–vincristine therapy for leukaemia (PUI *et al*), 283.
Transferrin receptor, circulating, in human serum (KOHGO *et al*), 277.

Von Willebrand factor, now cloned (LYNCH *et al*), 15.

XX phenotypic male, expression of two G-6-PD genes in (STEINBERG *et al*), 107.
